

Award for Azure at the WSA!

Azure Yacht Design & Naval Architecture is proud to announce that motor yacht Faith has won the award for Best Refitted Motor Yacht 2013 during the eight annual World Superyacht Awards. The awards gala took place on the 4th of May 2013 at the Çırağan Palace Kempinski in Istanbul, Turkey. We are very happy with this fine example of an up speed project being acknowledged with an award! MY Faith has been refitted in only four months.

The result is an ideal area for various types of leisure such as; sunbathing, swimming, clubbing, dining and lounging.

Generator foundations

Another request by the owner was reducing the sound- and vibration levels of the yacht. Azure achieved this by modifying the generator foundations, which resulted in a superb noise and vibration reduction.

Finally we would like to congratulate all parties involved in the project with this award!

NAME	Faith
L.O.A.	62.30M
BUILDER	Feadship Royal Van Lent
BUILDING YEAR	2000
REFIT YARD	Compositeworks
NAVAL ARCHITECT	Azure Yacht Design & Naval Architecture
EXTERIOR STYLING	Steve Howard Consulting
INTERIOR STYLING	Chahan Interior Design

Sundeck

According to the clients' wishes the whole sundeck has been modified into a large and open deck layout. This has been achieved by removing the helideck and jacuzzi on the aft deck. The new swimming pool with sunbathing beds on the foredeck is fully integrated with the existing structure. To be able to take the extra loads we have performed extensive calculations and verifications on board. Our calculation results enabled Composite Works to start building the composite pool and structure, which prevented any welding damage to the original superstructure.
